

Why Environmental Social and Governance

The world is changing dramatically. The people. The technologies. The climate.

And it's impacting investments.

These changes create new challenges as well as opportunities.

Environmental, Social and Governance data helps you understand how companies are positioned in this changing world.

For companies that fail to adapt, financial impacts can be serious.

With advances in technology and AI, MSCI has access to more data and information on companies than ever before

MSCI ESG data and ratings can provide insights that may not be captured in traditional financial analysis or through company disclosure alone.

Using thousands of sources, artificial intelligence, and proprietary models to transform and combine alternative data into actionable insights.

MSCI ESG Ratings model focuses on the ESG risks or opportunities that could affect a company's bottom line.

A recent MSCI study showed that ESG affected the valuation and performance of many of the companies in the study.

MSCI ESG data can help you make better investment decisions.

- Integrating ESG can help you assess long-term financial risks and opportunities.
- It can help you align investments with your values.
- Or identify companies that generate positive societal or environmental benefits while still offering returns

MSCI is one of the only providers to develop in-house, integrated ESG Ratings, Indexes and Analytical solutions to enable ESG integration across the investment process.

We strive to bring greater transparency to financial markets and support the evolving complex needs of the investment community.

That's why we make ESG and climate metrics of companies, funds and indexes public so you can understand the risks and opportunities and what's driving them.

At MSCI, we're modeling the changing world to help you turn today's ESG and climate risks into tomorrow's opportunities – *powering better investment decisions for a sustainable future.*

The foregoing shall not exclude or limit any liability that may not be applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.
